»pilot 4.0« – Tailor-made for You!

The new »pilot 4.0« measuring machine software combines form and function based on one common denominator: performance. Work processes can only be executed effectively and in the shortest possible time if features are accessible and processes are easy to understand.

Simple – displays clear symbols for every function

Modern – offers a state-of-the-art work environment

Motivating – achieve success quicker than ever before

Efficient – always takes the most direct path

»pilot 4.0« is Sure to Impress!

Top Features at a Glance: Visit ZOLLER to learn about the full benefits of the new software.

Selection:
New Main Menu Structure

Selections: New Main Menu Structure

Clear design and flexible organization for programs and tools – the new main menu in »pilot 4.0« always adapts to your tasks.

Makes organization a priority and upon launch displays only your Cockpit
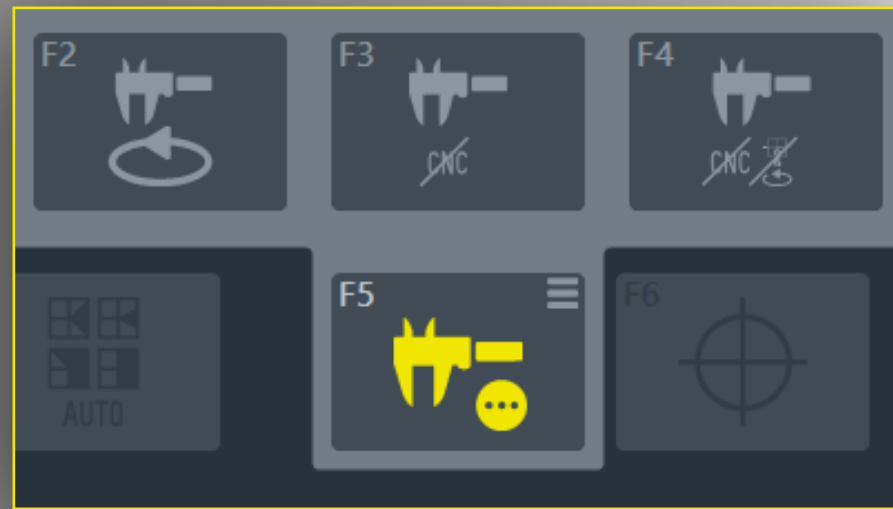

All of your favorites are displayed on the first row, so you can activate key functions directly with just a click

You set your identity via color codes or menu groups – to help you focus and select functions quickly

Customized:
User interface

After you log in with your ID, »pilot 4.0« displays the specific, personal work environment you have created.
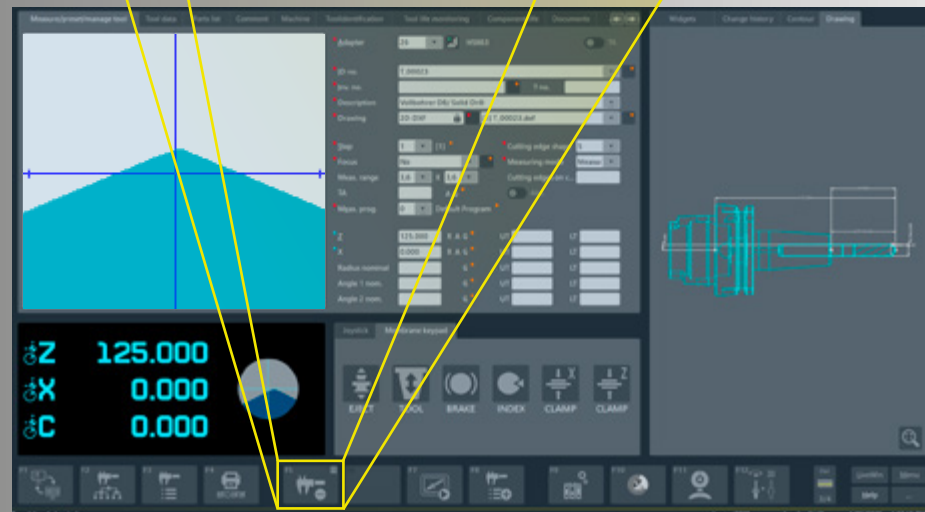

Create personalized button menus via drag & drop

Group function buttons for quick selection

Highlight frequently used functions as favorites

Label groups with custom color codes for faster guidance

Configurable:
New Buttons

Click customizable buttons and widgets to enable all of your key work functions quickly and directly.

Large widget area

Access your widgets from anywhere – on any ZOLLER machine, in the ZOLLER TMS web version, and at any ZOLLER TMS workplace

To-do lists as widgets: all of your tasks with just one click

Everything just how you like it: select widget position, size and appearance
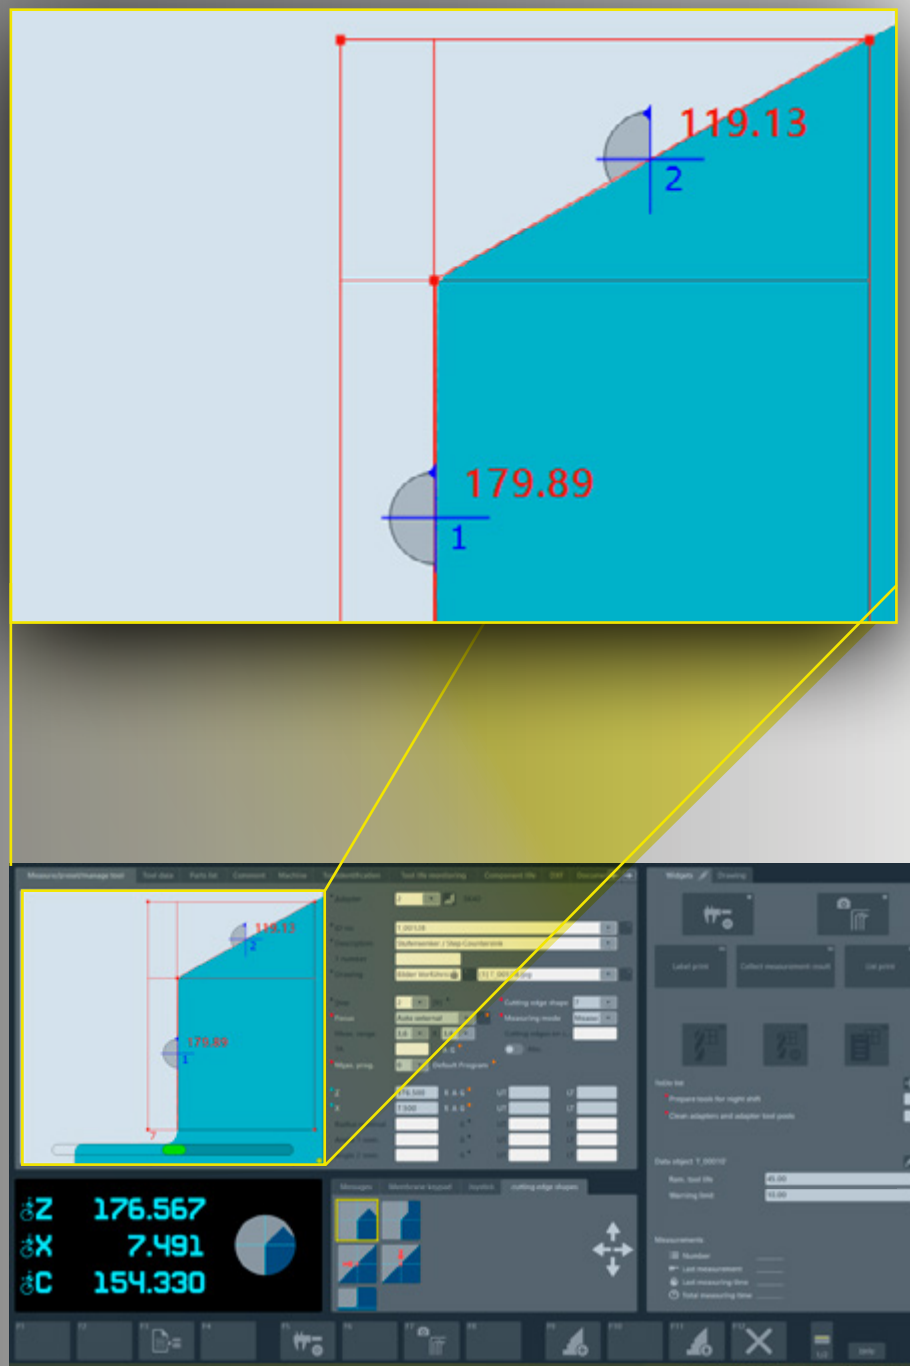

Large:
New Cutting Edge Image

»pilot 4.0« makes precision measurement down to the µm easy for anyone. Modern algorithms handle focus and automatic detection of cutting edge forms, numbers of cutting edges, numbers of stages and selecting the measuring range.

Large cutting edge display as a central element of the "Tool measurement, presetting, and management" module

Detailed precision and easy overview: makes it easier to detect cutting edge geometries and displays key data at a glance
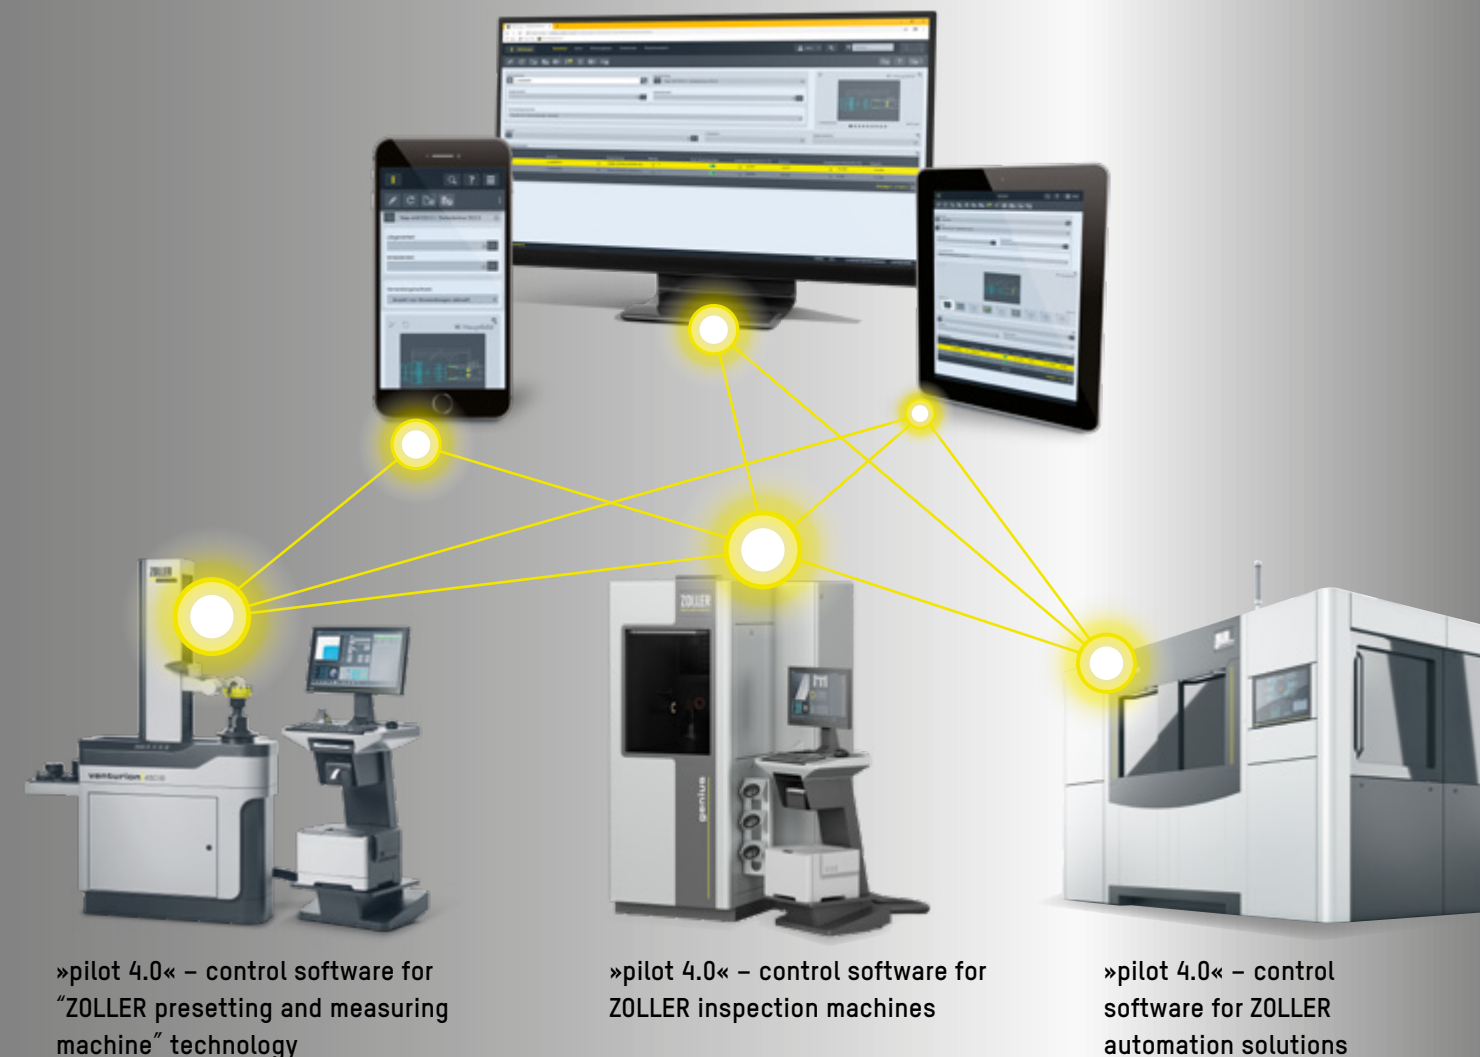

»pilot 4.0« reorganizes the angle display so you can quickly compare the camera image, drawing, and tool

Multiple angle displays in the camera window with angle mode individually selected for each angle

Everywhere:
Your »pilot 4.0«

Whether you are presetting, measuring, inspecting, managing, or automatically measuring tools – »pilot 4.0« always offers your own personalized programming interface, throughout the entire ZOLLER product landscape. »pilot 4.0« is your gateway to the digital web application, providing your team with access to data and applications from any smart device.

»pilot 4.0« – control software for "ZOLLER presetting and measuring machine" technology

»pilot 4.0« – control software for ZOLLER inspection machines

»pilot 4.0« – control software for ZOLLER automation solutions
