Optimizing complex manufacturing processes by making them more efficient

This is a challenge every company has to face in daily practice.

The ZOLLER - ToolsUnited interface enables a complete and simplified tool data acquisition in 2D and 3D format building up and extending your tool management.

All tool information and graphics are tranferred easily from the ToolsUnited master data pool in your ZOLLER TMS Tool Management Solutions tool database — wherever this database is located on the globe.

in addition to manufacturer's graphics, your individual graphics and tool parameters can be created and saved. You can find your tools quickly and easily using their parameters or ordering numbers.

### ZOLLER — Technology that Sets Standards

Our products combine innovative technology with easy handling. The ZOLLER Development department guarantees you steady progress – for economic and functional solutions that lower you costs.

CIMSOURCE – the information managers

Since 1992 CIMSOURCE Software structures your data. The main product line CIMSOURCE became a software kit with future-oriented database solutions for tool management.
