A look into the ZOLLER world

Inspection Solutions Workshop

In modern manufacturing, everyone is moving toward higher accuracy. Cutting tools today are designed to cut multiple operational steps in a single pass or setup. Many tool geometries must be accurate to the micron in order to cut part features to equivalent levels of precision. The expectation "first part, good part" is the norm in manufacturing today and the only way to achieve this standard is by checking through the entire value chain, starting with the tool, then the part, the assembly, and the final product.

Join the ZOLLER technical team and learn how to optimize your production processes with high-performance ZOLLER Tool Inspection Technology.

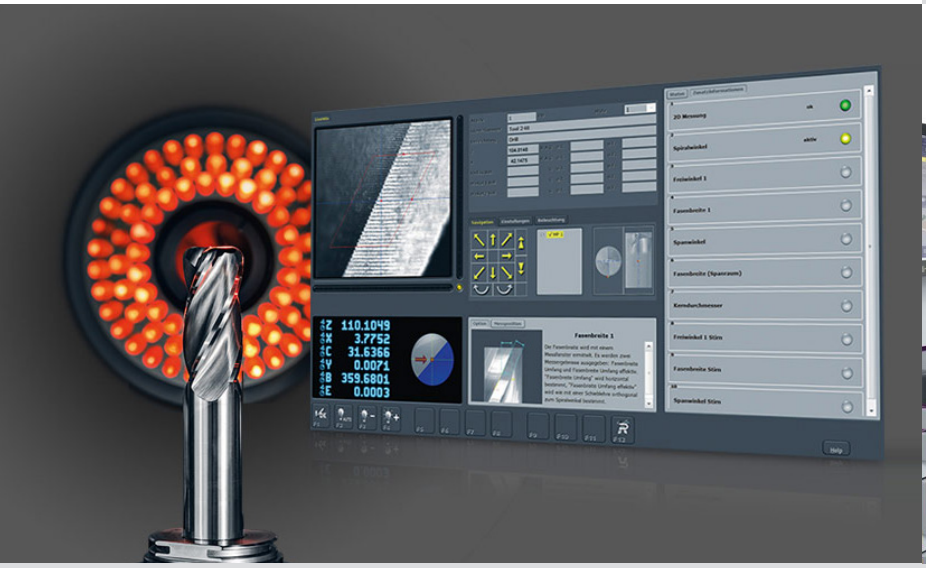
Setup Reduction ▪ In-Process Control ▪ Final Inspection

Don't miss out on this unique opportunity to bring your operations to the next level of productivity and profitability with ZOLLER Tool Inspection Technology!

Led by metrology experts, Werner Lueken, Michael Stepke and Matthew Brothers, this half-day workshop provides the perfect opportunity to explore in detail ZOLLER Tool Inspection Solutions live at our new headquarters and Industry 4.0 Tech Center in Ann Arbor, MI.

Workshop hours:
9:00 am – 1:00 pm

ZOLLER Inc.
3900 Research Park Drive
Ann Arbor, MI 48108, USA
phone: +1 (734) 332-4851
email: sales@zoller-usa.com



Agenda:

- Welcome and Introductions
- "Always one step ahead" — Overview of ZOLLER line of products & technology solutions
- Setup Reduction — Centralized and integrated grinding wheel preparation
- In-Process Control — Quick and easy tool qualification on the shop floor
- Final Inspection — Benefits of fully automated tool certification
- Lunch
- Open Forum, Q&A, individual consultations available with ZOLLER tool inspection team
